

# The Future in Focus

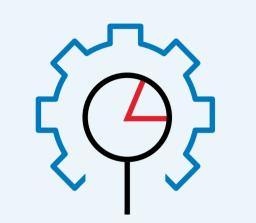

Companies in the digital age need to stay ahead of an ever-evolving competitive landscape. Yet, many find it challenging.

### Is your legal department prepared? Are you feeling these common pain points, too?

### **Ever increasing expectations** Align your priorities to expectations.

of lawyers say meeting changing leadership expectations is a top trend, but only 36% feel very prepared to do so.

Increasing volume and complexity of information Sometimes you need new solutions to address new demands.

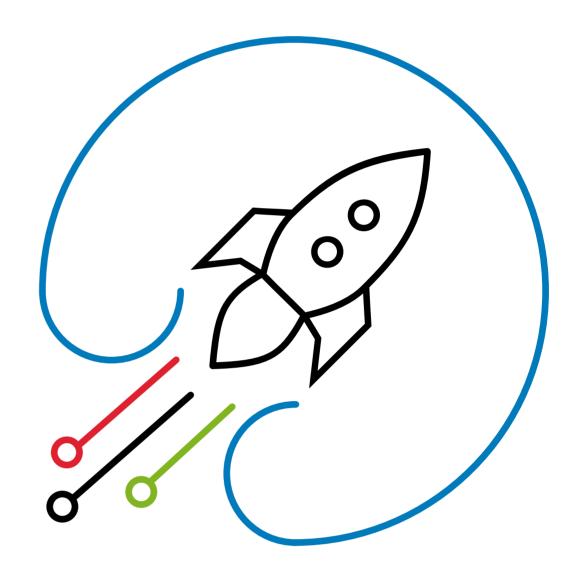

### Feeling inefficient or under-prepared

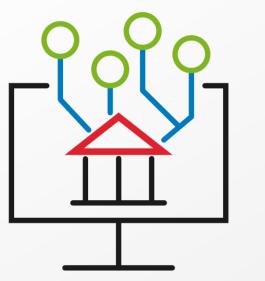

64% of lawyers in corporate legal departments say they don't feel their organization is very prepared to address the most significant trends.

### Technology-Based Trends

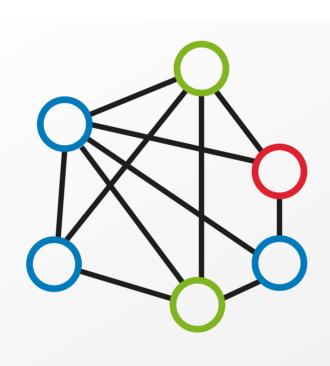

Future-oriented, proactive leaders can leverage technology to minimize hurdles and achieve optimal efficiency. In the next three years, 80% of legal professionals expect these trends to have the biggest impact.

Legal Technology

**Increased Volume and** 

**Meeting Evolving Stakeholder** 

Legisway provides you with new, improved legal technology capabilities that can make your Legal Department more resilient and optimize your performance.

#### **Complexity of Information**

Manage the complexity of information and regulations by streamlining your process with a Legisway solution that's right for you.

#### and Leadership Expectations

Legisway can help your Legal Department meet evolving expectations, do more with less, increase effectiveness and collaborate with the business.

### What's Happening? Key insights gathered from trends inform smarter decisions.

### Using technology to ensure compliance can lower your risk profile.

Legisway enables your team to track and enforce your processes, structures, and policies, making it easy to flag and address issues and risks.

### Insourcing is up. Corporate legal department insourcing gained 7% year over year, having the most momentum of any trend.

Legisway can help facilitate this by increasing both work quality and engagement so more work is kept in-house.

### The resistance curve to technology is evolving. Corporate legal departments have become more welcoming to the adoption of new technology and tools.

As legal departments examine what they will invest in, corporate lawyers identified the top technologies most important to their organization, including Legal Matter Management; Contract Management Software/ Contract Analytics; Document Management; Cybersecurity and Encryption Tools; e-signature; and Corporate Housekeeping (e.g., Entity Management).

Legisway helps get and keep you moving in the right direction for long-term success.

## **Digital Maturity**

Rather than be reactive, you can continue your technological transition as a proactive, future-oriented leader. Scattered, disorganized data management can be a distant memory after you centralize your data and let your productivity take flight. Customized, optimized solutions can help your team collaborate and automate processes like never before, all while reducing legal risks, procedural friction, and the time it takes to complete work.

The satisfaction of your stakeholders will continue to grow along with your efficiency and legal excellence.

### **Digital Maturity Curve**

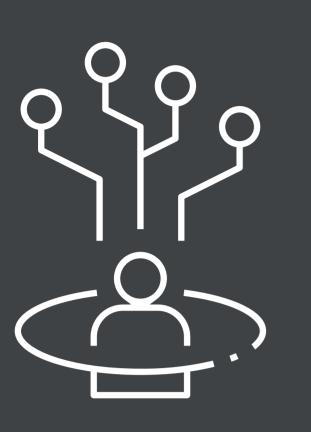

How can Legisway help? optimize legal teams. This boosts your productivity.

transparency. This delivers powerful insights.

compliance. This lowers legal risks.

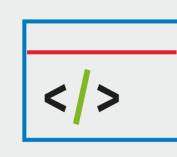

Lack of technology knowledge, understanding, or skills is now the most-cited reason by corporate legal teams for resistance to new technology.

Almost 50% of legal departments reported they felt this way.
